**FOUNDATION66**

**NSPCC**   
Cruelty to children must stop. **FULL STOP.**

## What is alcohol?

Alcohol is a chemical found in drinks such as wine, beer, gin and vodka.

People drink alcohol for different reasons, such as to make them feel happy or relaxed or because they like the taste.

Too much alcohol can harm the body and change how people behave and feel.

## Does this affect your family?

Is there an adult in your family whose drinking means that sometimes you:

- Make breakfast and get ready for school without any help?
- Look after younger brothers and sisters and even parents?
- Have to listen to constant arguing and fighting at home?
- Don't want to be at home?
- Feel you cannot bring friends home?
- Miss a lot of school?

## Who are FAS and how can we help?

We are the Family Alcohol Service (FAS). We help families living in Camden who are having problems because of an adult's drinking.

We help children and young people by listening to you and supporting you to cope with the things you may be finding difficult.

We help parents understand how their drinking affects the way they look after you.

Our family work can help you and your family to understand each other and get along better.

## Why not get in touch?

Give us a call, and we'll arrange for an FAS worker to meet you so that you can talk about the help you would like.

We won't tell anyone what you tell us, unless something you say makes us worry that somebody is in danger.

If you would like to talk to somebody at FAS, call us on:

**020 7428 1500**
